## overview

**Acceptance** emerges from the re-ignited Seattle scene where they have spent the last 3 years developing a passionate and loyal following throughout the North West. The band has toured nationally and shared stages with the likes of **Juliana Theory**, **Finch**, **Further Seems Forever** and **Seether** as well as performing successfully on the **Warped Tour** and **Cornerstone Festivals**. When the bands debut record, **Lost For Words** came out on Seattle indie, **Rocketstar Records** and quickly approached the 5000 sales mark, the industry at large began taking notice. When the band recorded a new 5 song demo with **Aaron Sprinkle (MxPX, Poor Old Lu)** this industry interest turned into serious courting by several major labels. After putting a professional management team in place to help determine the bands course of action, the band made the decision to release the **Black Lines To Battlefields EP** on **The Militia Group** who had been a long time friend and supporter of **Acceptance**. What the future holds for the band is made clear by simply listening to the CD or seeing the band live. Sincere, sophisticated and lyrically driven modern rock that has an extraordinary ability to connect deep with fans of all types of rock, punk and hardcore.
